Education

The Hong Kong University of Science and Technology — Hong Kong SAR
Ph.D. in Electronic and Computer Engineering; advisor: Prof. Jun Zhang — *Feb. 2025 – Present*

Beihang University — Beijing, China
B.Eng. in Computer Science and Technology — *Sep. 2020 – Jun. 2024*

Research Interests

My research interests focus on model efficiency and reinforcement learning (RL). I currently work on agentic RL for (M)LLMs; my prior work spans RL for image and video generation and inference acceleration for large foundation models (e.g., quantization, computation skipping, and efficient attention).

Experience

Tencent · Hunyuan — Shenzhen, China

Research Intern; mentor: Yonglong Tian — *Oct. 2026 – Present*

Agentic RL for (M)LLMs.

Research Intern; mentor: Tianyu Pang — *Feb. 2026 – Oct. 2026*

RL for image and video generative models.

ByteDance · Seed — Shenzhen, China

Research Intern; mentor: Yang Zhang — *Sep. 2025 – Nov. 2025*

Inference acceleration for (M)LLMs.

Microsoft Research Asia — Beijing, China

Research Intern; mentor: Fangyun Wei — *Dec. 2024 – Feb. 2025*

Video generation and world models.

SenseTime Research — Beijing & Shenzhen, China

Research Intern (multiple terms); mentor: Ruihao Gong — *May 2023 – Feb. 2026*

Compression and acceleration for image and video diffusion models and LLMs.

Projects

LightCompress: Accurate and Efficient AIGC Model Compression — *700+ GitHub stars*

Core contributor:

- Implemented a broad suite of LLM quantization methods, including QuaRot, GPTQ, SmoothQuant, and OmniQuant.
- Built an end-to-end toolkit supporting multiple model architectures, evaluation protocols, and inference backends.
- Documented practical quantization recipes across model families and deployment settings.

LightX2V: Light Video Generation Inference Framework — *2.5k+ GitHub stars*

Contributor:

- Contributed to the framework design for adding Wan and HunyuanVideo model support.
- Integrated quantization, feature caching, and sparse attention features into the framework.
- Contributed to model distillation for LightX2V.

Academic Service

- **Conference reviewer**: NeurIPS, ICLR, ICML, COLM, AAAI, CVPR, and ECCV.

Skills

- **Programming & Frameworks**: Python, C, Java, PyTorch, and NumPy.
- **Research**: Reinforcement learning, model compression, and model acceleration.
